Introduction

LT-501 is a RF Network tracker specifically designed for both indoor and outdoor monitoring on objects. It is compact, light, and easy to use. The device is also equipped with the re-chargeable battery to provide basic power usage. The device allows monitoring center to remotely configure and track the device immediately or periodically by sending RF commands to the device. **Geo-fence configuration is also available to create permissible areas or restricted areas to provide more flexible monitoring options of the device.** (Geo-Fence needs to be done by Application Server, includes outdoor and indoor geo-fence)

Product Features

- Support LoRaWAN™ Class A/ Class C
- Outdoor / Indoor geo-location
- Long-distance transmission
- Regular/ Real-time tracking by remote configuration (Report interval, Enable/ Disable GPS, Buzzer, Ping)
- Built- in 3 axis accelerometer for motion detector
- Built in BLE for beacon (Indoor positioning)
- Configurable setting via BLE
- Support buzzer for alert
- Power Low/ Off alert
- Support Geo-fencing functions (need to be done by AS/ EzFinder side)
- Support help report
- Micro USB connector
- Built- in watchdog
